 **FLACARP**

CATALOGUE 2024 | FISHING ELECTRONICS

ESHOP

The top Czech FLACARP X8 bite alarms are based on the popular X7 model and add many useful features. In addition to the proven design, very high mechanical durability, precise line unwinding sensor with a detection from 1.5mm in both directions and last but not least, power supply with regular AAA batteries, new features have been added: false bites suppression (e.g. for fishing in bad weather or from a boat), a night position light on the swinger, a wider range of line movement length adjustment from 1.5mm up to 30cm, improved backward line movement sound for clear distinction of unwinding direction, a wider range of LED color settings and other improvements.

FEATURES

- ➔ Precise digital line unwind sensor, with a wide range of movement length adjustment **(from 1.5mm up to 30cm) with a new function to minimise false alarms (wave and false line movement detection when fishing from a boat or in bad weather, time zeroing of false line unwind path). The function can be switched on/off.**
- ➔ Intuitive RGB indication to show the line unwinding direction, **now with a wider range of LED color choices.** LED brightness control and the option to switch the LED off completely.
- ➔ Loud sounds with infinitely adjustable volume control with mute option. **Improved acoustic differentiation of the backward line movement.**
- ➔ Integrated remote receiver with a long range of up to 1km
- ➔ Intuitive toggle switch with clear on/off position
- ➔ MUTE button for easy control of other functions
- ➔ Night position LED on the bite alarm, now also on the connected swinger. **At night the swinger lights dimly, goes to full brightness when the bite is taken and copies the intensity of the bite by flashing. The function can be switched on/off.**
- ➔ High strength and durability of the materials used: housing do not crack, screws do not overturn
- ➔ Rainproof is ensured by a set of seals, even knobs and LEDs are sealed
- ➔ Metal axis, which does not „burn“ when fast bite
- ➔ Powered by standard AAA size batteries (2 x 1.5V)

The FLACARP RX8 receiver takes over from its previous model RX7 great features (long range up to 1km, 12 channels, control up to 4 FLACARP lights) and adds other useful features: thanks to the motion sensor alarms blocking function, you will no longer hear any unnecessary alarms.

The signal from the sensors is muted when the bite is taken, or the alarms can be switched off by one press of the button on the receiver. The notification of unwanted turn-off of the bite alarm has also been improved with an obvious fluctuating tone. The function of saving (pairing) additional bite alarms and sensors has been completely redesigned - everything is now much simpler.

FEATURES

- ⊕ Up to 12 FLACARP devices can be saved in memory (bite alarms, motion sensors ...)
- ⊕ Evaluates the bite, which it alerts with the same LED color and tone as set on the bite alarm
- ⊕ Acoustically and visually distinguishes between backward and forward line movement
- ⊕ Volume settings with the option to switch it off completely
- ⊕ Vibration notification option
- ⊕ Evaluates alarms from motion and shock sensors FLACARP. **Now with the option to block the alarm when a bite is taken (the angler will therefore not be bothered by repetitive motion alarms when catching a fish). The alarm can also be muted by simply pressing a button directly on the receiver (it is muted for 5 minutes after the last registered movement).**
- ⊕ Up to 4 FLACARP LED lights can be easily controlled by the main button on the receiver.
- ⊕ Long battery life, battery indication
- ⊕ Powered by standard batteries AAA (2 x 1.5V)

We develop and manufacture for you in Czechia a quality fishing electronics with more than 25 years of experience.

FLACARP bite alarms are supplied in a durable XXL case, in sets of two to four bite alarms + receiver. Thanks to the clever storage, **the compact dimensions** of the whole case are maintained, which measures only 27x20x8cm. The free positions in the XXL case allow you to expand the set with other FLACARP products: waterproof LED light FL6+,

ALI (AL2) motion alarms, SENS micro sensors for monitoring your expensive equipment ... **Thanks to FLACARP clever product compatibility, it's easy.**

NEW

And what all can fit in the XXL case?

- ⊕ 4x bite alarms + 1x receiver
- ⊕ 1x FLACARP FL6+ light
- ⊕ FLACARP AL1 or AL2 alarm
- ⊕ Up to three SENS micro-sensors
- ⊕ 1x lanyard for receiver

OUR OFFER INCLUDES 3 TYPES OF SETS

2+1 3+1 4+1

+ other accessories of your choice

FLACARP motion sensors help you keep an eye on your expensive equipment. They detect the movement of unwanted people around your fishing spot, bivouac, boat, parked car ...

⚙️ MOTION SENSOR FLACARP AL2

- ➔ Detect unwanted movement on angle of 140 degrees with a range up to 6 m
- ➔ For the double-sided version, the detection angle is 140 degrees from the front side and 140 degrees from the back side
- ➔ Switchable sensitivity (6m / 3m)
- ➔ False alarms filter
- ➔ Sends alarm to any FLACARP receiver up to 1km
- ➔ Integrated position LED light with remote control option
- ➔ Durable design, perfect protection against rain
- ➔ Powered by two standard AAA batteries (2x1.5V)
- ➔ Long battery life
- ➔ Double-side (AL2) and single-side sensor (AL1) versions

When motion is detected, it immediately alerts the angler on his receiver, where an acoustic alarm sounds and the LED lights up.

⚙️ MICRO-ALARM FLACARP SENS

Easily keeps an eye on your equipments. Detects change of position, shaking, unwanted handling. Wirelessly sends an alarm to your receiver. Long range, adjustable sensitivity, small dimensions only 4x4x1,5 cm, powered by CR2450 battery.

⚙️ LED LIGHT FLACARP FL6+ WITH RECEIVER

- ⊕ **LED LIGHT FLACARP FL6+ WITH RECEIVER**
- ⊕ Rechargeable flashlight with built-in powerful 2000 mAh Li-Ion battery
- ⊕ **Position light function with up to 360 hours of lighting**
- ⊕ Memory for up to 10 FLACARP devices
- ⊕ RGB light - you can switch LED colors, match a color to a specific bite alarm or sensor, or transfer the same LED color as set on bite alarm
- ⊕ LED intensity levels (brightness adjustment)
- ⊕ 100% waterproof design, use in bivouac or as an outdoor light
- ⊕ Easy charging from any phone charger, car or power bank (microUSB connector)
- ⊕ Integrated receiver range up to 1 km !
- ⊕ Can be used as a remote controlled position light or as buoy
- ⊕ Strong magnet and loop for easy hanging

⚙️ RECHARGEABLE HEADLAMP FLACARP HL4RX WITH RECEIVER

- ⊕ Rechargeable headlamp with wireless receiver
- ⊕ Powerful light (300lm) with Turbo function for long distance lighting
- ⊕ Green and red light for night backlighting
- ⊕ Connectible with FLACARP devices, lights up after a bite or during an alarm
- ⊕ Intuitive two-button control
- ⊕ Reliable IPX4 protection against rain
- ⊕ Dimensions 72 x 37 x 37mm
- ⊕ USB-C connector for easy charging from any charger or power bank with current up to 1A

FLACARP HL2000 top quality rechargeable LED headlamp

FLACARP HL2000 top quality rechargeable headlamp with powerful white and green LED and high-capacity Li-Pol battery, developed precisely for the needs of the anglers. Simple, intuitive control and up to 360 hours of lighting per charge. High performance while maintaining small size and light weight.

FEATURES

- ⦿ Powerful white LED with parabola
- ⦿ Up to 90 hours of lighting
- ⦿ Powerful green LED for night backlighting
- ⦿ Adjustable LED intensity (brightness control)
- ⦿ Up to 360 hours of light per charge! (night position light)
- ⦿ Integrated 2000mAh Li-Pol battery
- ⦿ LED indication of battery capacity
- ⦿ Intuitive two-button operation (each button controls one LED)
- ⦿ USB-C connector for easy charging from any charger or power bank with current up to 500mA
- ⦿ Dimensions only 38x57x25mm
- ⦿ Reliable IPX4 protection against rain, low weight

FLACARP MAGS magnetic quick release connector

Stainless steel quick release connector with strong neodymium magnets. Used for easy release of the bite alarm without screwing.

FEATURES

- ⦿ Made of stainless steel. This guarantees high strength and long life.
- ⦿ Holds tight thanks to two strong neodymium magnets
- ⦿ The internal octagon allows easy rotation to the required position
- ⦿ Inerasable laser marking of the logo
- ⦿ Total length 40mm, diameter 29mm, weight 47g
- ⦿ An original FLACARP product, made in the Czechia
- ⦿ Packing of one piece (MAGS1) or two pieces (MAGS2)

QUALITY EUROPEAN FISHING ELECTRONICS

FLACARP

Dear fishermen,
We develop and manufacture FLACARP products for you with the greatest care in Bzenec in the Czech Republic. Already during the development, we try to satisfy your wishes and expectations. We use the best materials, top electronic components, and we apply our many years of experience dating back to 1994. We provide fast delivery, flexible response to your requirements and great service.

Thank you for your interest.
